OBJECTIVE

A motivated .NET Developer with a strong background in backend development. Skilled in building scalable web applications using ASP.NET Core, Web API, and Entity Framework, with a solid foundation in database design and SQL. Combines analytical thinking from Business Intelligence experience with software engineering practices to deliver efficient, high-performance solutions. Seeking to contribute to innovative development teams and build robust, user-focused applications.

EXPERIENCE

Freelance .NET Developer | Hotel Management System

Mar 2026 – Apr 2026

- Designed and developed a full-featured hotel management system supporting both web and mobile platforms.
- Built a web application using ASP.NET MVC to manage reservations, room allocation, and customer orders.
- Developed RESTful APIs using ASP.NET Core Web API to support mobile application integration.
- Implemented secure authentication and authorization using JWT with role-based access control (Admin, Staff).
- Designed and optimized SQL Server database for managing rooms, bookings, and transactions efficiently.
- Generated analytical reports and dashboards to monitor reservations, occupancy rates, and revenue insights.
- Applied Entity Framework Core and LINQ for efficient data access and business logic implementation.
- Ensured system performance, scalability, and security through validation, error handling, and optimization techniques.
- Collaborated with the client to gather requirements and deliver a scalable, user-friendly solution

EDUCATION

Bachelor of Computer Science and Information Technology | Egyptian E-Learning University (EELU)

Oct 2023 – Present

- Currently in 3rd Year

PROJECT

E-Commerce Platform | Clothing Store

- Built a full database system for an online clothing store.
- Managed products, orders, customers, and payments, ensuring data integrity and scalability.

Hotel Management System

- Developed a comprehensive hotel management database system.
- Managed reservations, room availability, customer records, and billing processes efficiently.

CERTIFICATIONS

Full Stack .NET Developer Trainee | Digital Egypt Pioneers Initiative (DEPI)

2025 – Present

- Comprehensive training in Full Stack Web Development using .NET technologies

Web Development using .NET (Summer Training) | Information Technology Institute (ITI)

23 June 2025 – 27 July 2025

- Hands-on experience in building web applications using ASP.NET

TECHNICAL SKILLS

Programming Languages: C#, JavaScript, SQL

Backend Development: ASP.NET Core, ASP.NET MVC, Web API, Entity Framework Core, LINQ

Frontend Development: HTML, CSS, JavaScript, Bootstrap

Database Management: Microsoft SQL Server, Database Design, CRUD Operations, Stored Procedures

Tools & Technologies: Visual Studio, Git & GitHub, Postman

Architecture & Concepts: OOP, RESTful APIs, MVC Architecture

SOFT SKILLS

Analytical & Problem-Solving: Strong ability to analyze complex data and develop effective solutions.

Communication & Presentation: Clear and effective communication, presenting data-driven insights to stakeholders.

Collaboration & Teamwork: Proven ability to work collaboratively in cross-functional teams, fostering a cooperative environment.

Prioritization: Efficient in managing multiple tasks and prioritizing to meet deadlines.

Flexibility: Agile in adapting to new tools, technologies, and methodologies in a dynamic work environment.

Willingness to Learn: Open to feedback and continuously seeking opportunities for professional growth.
